

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A spectacle kit [comprises] comprising:  
a pair of lenses made of flexible material joined by a nose bridge portion, and  
a pair of side arms,  
each lens having an outer upper portion and an outer lower portion said upper and lower portions being moveable toward one another so as to overlap and form a convex curved portion in each lens, and [characterised by]  
each side arm including a slot suitable for receiving and retaining the upper and lower portions of each lens.
2. (Currently Amended) A spectacle kit according to claim 1, wherein the lens material comprises a flat sheet material which allows printed matter to be provided thereon.
3. (Previously Amended) A spectacle kit according to claim 1 wherein the lenses comprise coloured or sunlight filtering lenses.
4. (Previously Amended) A spectacle kit according to claim 1 wherein the lenses are provided with a plurality of apertures through which a wearer may see.
5. (Currently Twice Amended) A spectacle kit according to claim [1] 4 wherein the apertures comprise holes.
6. (Currently Twice Amended) A spectacle kit according to claim [1] 4 wherein the apertures comprise slots.

7. (Currently Twice Amended) A spectacle kit according to claim 1 wherein the upper portions and the lower portions may be provided with apertures in their end portions such that the [holes] apertures are aligned during assembly of the spectacles.
8. (Currently Twice Amended) A spectacle kit according to claim [1] 7 wherein the side arms comprise spigots of a suitable size to receive the aligned [holes] apertures of each end of the spectacle lens.
9. (Previously Amended) A spectacle kit according to claim 1 wherein the upper portions and lower portions are connected to each other.
10. (Previously Amended) A spectacle kit according to claim 1 wherein the upper and lower portions are connected to each other by a perforated strip.
11. (Previously Amended) A spectacle kit according to claim 1 wherein the upper and lower portions are arranged to overlap one another during assembly.
12. (Previously Amended) A spectacle kit according to claim 1 wherein the spectacle side arms are manufactured from flexible flat sheet material.
13. (Previously Amended) A spectacle kit according to claim 1 wherein the side arms are manufactured from a similar or identical material to that of the lens and therefore be cut out from the same sheet material during the manufacturing process.
14. (Previously Amended) A spectacle kit according to claim 1 wherein the side arms are provided with folds to assist in their assembly.
15. (Previously Amended) A spectacle kit according to claim 1 wherein the side arms are manufactured from rigid plastic material.

16. (Previously Amended) A spectacle kit according to claim 1 wherein the side arms each include a hinge.
17. (Currently Twice Amended) A spectacle kit according to claim [1] 8 wherein each slot is adjacent the spigot.
18. (Previously Amended) A spectacle kit according to claim 1 wherein the side arms are curved so as to be suitable for gripping the sides of a wearer's head.
19. (Currently Twice Amended) A spectacle kit according to claim [1] 16 wherein the hinge portion comprises a notch so as to enable the side arms to be folded toward one another during use of the spectacles.
20. (Currently Twice Amended) A spectacle kit according to claim 1 wherein the spectacle kit parts are manufactured from the same sheet material and removably attached to a waste portion of such sheet material such that each kit part is removable therefrom.
21. (Previously Amended) A spectacle kit according to claim 1 wherein the kit further comprises a nose bridge element formed to be removably attachable to the lenses nose bridge portion.
22. (Original) A spectacle kit according to claim 21 wherein the nose bridge element is manufactured from rigid plastic material.
23. (Currently Amended) A pair of spectacles [comprises] comprising:  
a pair of lenses made from flexible material and a pair of side arms, each lens having an upper arm and a lower arm disposed at its outer edge, said arms at each edge overlapping one another such that each lens is provided with a curved portion [characterised by] wherein each side arm include[ing]es a slot suitable for receiving a corresponding end portion of the pair of flexible lenses.
